

The unique vehicle tracking system that is essential to recover your stolen vehicle.

CobraConnex VTS ICD - 13

For Toyota Hilux, Fortuner & Inova
Original vehicle warranty is intact

Why vehicle tracking system?

Recovers your stolen vehicle

An After Theft System for Vehicle Recovery instantly detects, tracks and communicates information to a Control Room which is swiftly relayed to the Recovery Team and the police, enabling a speedy recovery.

Provides pinpoint accuracy

Using GPS and precise digital maps, the Control Room is able to track your stolen car down to the name of the street and building.

Keeps you connected

It combines GSM, GPS and internet technologies to keep you in touch with your vehicle any time from anywhere, via the phone. You will be the first to be alerted if anyone tampers with your car.

Why CobraConnex?

Building confidence and trust through our commitment.

Our extensive experience in vehicle security enables us to recognise and select only the best solutions for you and we will always be there when you need us most.

Matching the highest standards in vehicle telematics security system.

The Thatcham 5 standards are applied to the security device, the Secure Operating Centre, SOC (which must operate 24/7 with full back-up monitoring systems) and the installers who must be trained and registered. It's your guarantee of absolute quality and peace of mind.

Total support to ensure that your CobraConnex is fully functional at all times.

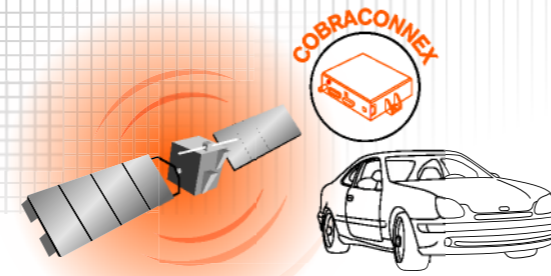

The SOC is always ready to provide assistance, no matter when you need it. It incorporates the Call Centre and Help Desk as well as a Control Room which takes over in the case of theft to track your vehicle using advanced digital mapping and co-ordinate with the 24/7 Recovery Team and Police to recover it.

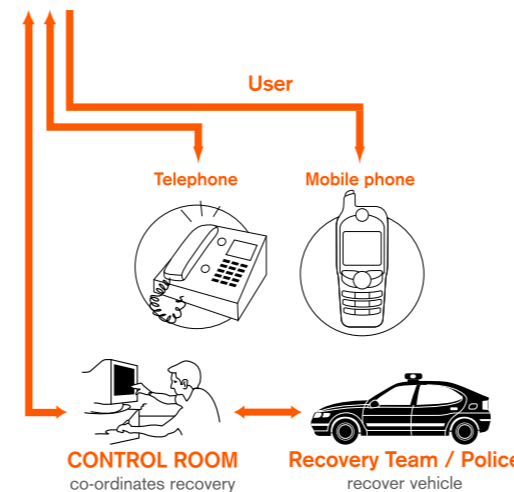

Access is password protected, therefore your privacy is in your own hands.

Extensive security measures are in place to ensure the absolute safety of your private information. For complete privacy, human assistance is enlisted only in cases of theft, which means the Control Room will only be able to track to your car when the system goes into theft mode.

How CobraConnex works

GPS (Global Positioning System)
pinpoints the exact vehicle position

In case of theft

SITUATION	ALERTS		
	SMS Received	VOCAL ALERTS Received	CALL FROM CONTROL ROOM Received
INTRUSION* Vehicle alarm has been triggered	✓	✓
