

Sensors & Modules

Alarm systems can benefit from increased security levels by adding one or more sensors.

AM5462

Hyperfrequency module (Interior Volumetric Protection)

- Better suited for convertible cars
- Adjustable sensitivity

Nominal voltage: 12 VDC
Operating voltage range: 9 - 16 VDC
Working temperature:
-40 °C - + 85°C
Dimensions: 52 x 52 x 13 mm
Consumption: < 5 mA
Working frequency: 2,45 GHz

AM5452

Level monitor

- Detects lifting of vehicle by 2 degrees
- Protection against wheel theft

Nominal voltage: 12 VDC
Operating voltage range: 9 - 16 VDC
Working temperature:
-40 °C - + 85°C
Dimensions: 65 x 25 x 55 mm
Consumption: < 4,6 mA

AM2057

Shock sensor

- Detects shocks on vehicle
- Adjustable sensitivity

Nominal voltage: 12 VDC
Operating voltage range: 9 - 16 VDC
Working temperature:
-40 °C - + 85°C
Dimensions: 60 x 45 x 23 mm
Consumption: < 0,5 mA
